on more than one instance leading up to the coal strike. Naturally, like any man that has anything to do with public affairs, I not only take, but am bound to take, the very deepest interest in all the manifold social problems, which include as one section of them what we group together as the labor problem. More and more, as our modern industrial progress goes on, there is a tendency to work in federation or combination, both among employers and employes, in corporations and in unions, and, of course, gentlemen, among the reasons why I take a very great interest in these combinations is the very fact that by their power they have such great possibilifor good, which necessarily implies that they also have great possibilities for evil. Whether you wish them or not, it is idle, in my opinion, to protest against the inevitable tendency of the times toward both corporation and union. It is worse than folly to take exceptions to either corporation or union as such. The line should e drawn on conduct. I greet you with all heartiness and am delighted to see you." By the President's action the sentence is commuted to expire July 1, 1905, which reduces his term of confinement about two and a half years.
